PROJECTS

Task Manager App | [Live Demo](#) | [GitHub](#)

React.js, Node.js, Express.js, PostgreSQL, Neon, JWT

- Developed a production-ready, full-stack task management application featuring end-to-end user workflows.
- Implemented secure user authentication and granular authorization mechanisms leveraging JSON Web Tokens (JWT).
- Designed and developed robust RESTful APIs to handle core CRUD operations, task creation, updates, and deletions.
- Integrated Neon PostgreSQL cloud database for persistent storage, optimized connection handling, and reliable data retention.
- Deployed the modular architecture seamlessly with the frontend hosted on Vercel and the backend services on Render.
- Engineered tracking functionality to streamline workflow productivity, allowing user-driven task prioritization, due date tracking, and structured status management.

ACHIEVEMENTS & DATA STRUCTURES AND ALGORITHMS (DSA)

- Solved 120+ algorithmic and data structure optimization problems on LeetCode.
- Earned a 2-Star proficiency rating on CodeChef competitive programming platform.
- Possess a strong conceptual and practical understanding of fundamental structures and paradigms: Arrays, Linked Lists, Stacks, Queues, Trees, Binary Search Trees (BSTs), Graphs, Recursion, and Dynamic Programming.
- Successfully built, containerized/configured, and deployed a complete full-stack web application to cloud platforms.
